Pregnant Mare Serum Gonadotropin (PMSG) is a hormone and complex glycoprotein obtained from the serum of pregnant mares. This 43-63 kDa protein is capable of supplementing and being substituted for the follicle stimulating gonadotrophin and interstitial cell-stimulating hormone of the anterior pituitary gland in both males and females. Thus PMSG-Intervet stimulates development of the ovarian follicle in the female.

**Target:** PMSG

**Host:** Horse

**Conjugation:** Unconjugated

**Form:** Lyophilized

**Reconstitution:** Reconstitute in sterile 18 MΩ · cm water to a concentration of 1000 IU/ml, which can then be further diluted if required.

**Storage:** Stable at room temperature for up to 3 weeks prior to reconstitution. Store at 2-8 °C.

**Buffer:** Contains no additives.

**Note:** This product is for research use only.
Not for human consumption, cosmetic, therapeutic or diagnostic use.
