

Microsomal Triglyceride Transfer Protein (MTTP) Antibody

Catalogue No.: abx001454

Western blot analysis of extracts of various cell lines using MTTP Antibody (1/1000 dilution).

MTTP Antibody is a Rabbit Polyclonal antibody against MTTP. MTP encodes the large subunit of the heterodimeric microsomal triglyceride transfer protein. Protein disulfide isomerase (PDI) completes the heterodimeric microsomal triglyceride transfer protein, which has been shown to play a central role in lipoprotein assembly. Mutations in MTP can cause abetalipoproteinemia. [provided by RefSeq, Jul 2008].
