

Tumor Necrosis Factor Alpha-Induced Protein 3 (TNFAIP3) Antibody

Catalogue No.: abx001739

Immunofluorescence analysis of U2OS cells using TNFAIP3 Antibody

TNFAIP3 Antibody is a Rabbit Polyclonal antibody against TNFAIP3. This gene was identified as a gene whose expression is rapidly induced by the tumor necrosis factor (TNF). The protein encoded by this gene is a zinc finger protein and ubiquitin-editing enzyme, and has been shown to inhibit NF-kappa B activation as well as TNF-mediated apoptosis. The encoded protein, which has both ubiquitin ligase and deubiquitinase activities, is involved in the cytokine-mediated immune and inflammatory responses. Several transcript variants encoding the same protein have been found for this gene.
