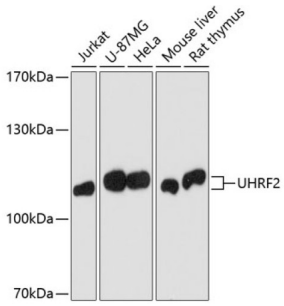
Ubiquitin Like With PHD And Ring Finger Domains 2 (UHRF2) Antibody

Catalogue No.:abx001901



Western blot analysis of extracts of various cell lines using Uhrf2 Antibody (1/1000 dilution).

UHRF2 Antibody is a Rabbit Polyclonal antibody against UHRF2. This gene encodes a nuclear protein which is involved in cell-cycle regulation. The encoded protein is a ubiquitin-ligase capable of ubiquinating PCNP (PEST-containing nuclear protein), and together they may play a role in tumorigenesis. The encoded protein contains an NIRF_N domain, a PHD finger, a set- and ring-associated (SRA) domain, and a RING finger domain and several of these domains have been shown to be essential for the regulation of cell proliferation. This protein may also have a role in intranuclear degradation of polyglutamine aggregates. Alternative splicing results in multiple transcript variants some of which are non-protein coding.
