

Zinc Finger E-Box-Binding Homeobox 1 (ZEB1) Antibody

Catalogue No.: abx025239

This gene encodes a zinc finger transcription factor. The encoded protein likely plays a role in transcriptional repression of interleukin 2. Mutations in this gene have been associated with posterior polymorphous corneal dystrophy-3 and late-onset Fuchs endothelial corneal dystrophy. Alternatively spliced transcript variants encoding different isoforms have been described. This antibody is supplied as crude ascites.
