

Human Receptor-Type Tyrosine-Protein Phosphatase F (PTPRF) Protein

Catalogue No.: abx168855

SDS-PAGE analysis of Human PTPRF Protein.

Human PTPRF Protein is a recombinant Human protein produced in a Prokaryotic expression system (E. coli).

Target: Receptor-Type Tyrosine-Protein Phosphatase F (PTPRF)

Origin: Human

Expression: Recombinant

Tested Applications: WB, SDS-PAGE

Host: E. coli

Conjugation: Unconjugated

Form: Lyophilized

Activity: Not tested

Purity: > 97%

Reconstitution: To keep the original salt concentration, we recommend reconstituting to the original concentration prior to lyophilization (see Concentration) in ddH₂O. If a lower concentration is required, dilute in 20 mM Tris, 150 mM NaCl, pH 8.0. If a higher concentration is required, the product can be reconstituted directly in 20 mM Tris, 150 mM NaCl, pH 8.0, though please note that this will change the overall salt concentration. The stock concentration should be between 0.1-1.0 mg/ml. Do not vortex.

Storage: Store at 2-8°C for up to one month. For long-term storage, store at -80°C. Avoid repeated freeze/thaw cycles.
