

Poliovirus Receptor Related Protein 3 (NECTIN3) Antibody

Catalogue No.: abx027068

Nectins (e.g., PVRL1; MIM 600644) are immunoglobulin-like adhesion molecules that interact with afadin (AF6; MIM 159559). Afadin is an actin filament-binding protein that connects nectins to the actin cytoskeleton. The nectin-afadin system organizes adherens junctions cooperatively with the cadherin (see MIM 192090) catenin (see MIM 116805) system in epithelial cells.
