SDS-PAGE analysis of Hepcidin 25 (Hepc 25) Protein (OVA).

Human Hepcidin 25 (Hepc 25) Peptide (OVA) is a OVA conjugated peptide synthesized from the Hepcidin-25 region of Human Hepcidin.

Target: Hepcidin 25 (Hepc 25)

Origin: Human

Expression: Synthetic

Tested Applications: SDS-PAGE

Host: Synthetic

Conjugation: OVA

Form: Lyophilized

Activity: Not tested

Purity: > 90%

Reconstitution: To keep the original salt concentration, we recommend reconstituting to the original concentration prior to lyophilization (see Concentration) in ddH₂O. If a lower concentration is required, dilute in 10 mM PBS, pH 7.4. If a higher concentration is required, the product can be reconstituted directly in 10 mM PBS, pH 7.4, though please note that this will change the overall salt concentration. The stock concentration should be between 0.1-1.0 mg/ml. Do not vortex.

Storage: Store at 2-8°C for up to one month. For long-term storage, store at -80°C. Avoid repeated freeze/thaw cycles.
