

Mouse AARS shRNA Plasmid

Catalogue No.: abx982155

Plasmid map (pGPU6/GFP/Neo).

shRNA Plasmid to inhibit AARS expression by RNA interference. This product contains 3 separate slightly different shRNA sequences which knock down mouse AARS gene specifically. Each vial contains 50 µg of lyophilized shRNA.

Target: AARS

Reactivity: Mouse

Tested Applications: RNAi

Host: E. coli

Form: Lyophilized

Quality Control: The sequence of shRNA is guaranteed by sequencing.

Storage: Store lyophilized shRNA plasmid DNA at -20 °C with desiccant. Stable for one year. Once resuspended, store at 4 °C for short term storage or -80 °C for long term storage. Avoid repeated freeze/thaw cycles.

UniProt Primary AC: Q8BGQ7 ([UniProt](#), [ExPASy](#))

Gene Symbol: AARS

GeneID: [234734](#)

NCBI Accession: NM_146217.4

KEGG: mmu:234734

Specificity: AARS shRNA Plasmid (Mouse) contains 3 different target-specific plasmids each encoding 19-23 nt (plus hairpin) shRNAs designed to knock down gene expression. Each plasmid contains a resistance gene for the selection of cells stably expressing shRNA.

Datasheet

Version: 2.0.0

Revision date: 07 Dec 2024

Note: This product is for research use only.

Directions for use: Resuspend lyophilized shRNA plasmid DNA in 500 µl of deionised water. Each vial contains 50 µg of lyophilized shRNA plasmid DNA. Suitable for up to 50 transfections.

For Reference Only
