

Putative tRNA (cytidine(32)/guanosine(34)-2'-O)-Methyltransferase (FTSJ1) Antibody

Catalogue No.: abx028610

The protein encoded by this gene is a member of the S-adenosylmethionine-binding protein family. It is a nucleolar protein and may be involved in the processing and modification of rRNA. Three alternatively spliced transcript variants encoding different isoforms have been described for this gene. [provided by RefSeq].
