Catalogue No.: abx002270

Immunofluorescence analysis of HeLa cells using CSF2RA Antibody (1/100 dilution, 40x lens).
Blue: DAPI for nuclear staining.

CSF2RA Antibody is a Rabbit Polyclonal antibody against CSF2RA. The protein encoded by this gene is the alpha subunit of the heterodimeric receptor for colony stimulating factor 2, a cytokine which controls the production, differentiation, and function of granulocytes and macrophages. The encoded protein is a member of the cytokine family of receptors. This gene is found in the pseudoautosomal region (PAR) of the X and Y chromosomes. Multiple transcript variants encoding different isoforms have been found for this gene, with some of the isoforms being membrane-bound and others being soluble.
