

Protein Unc-93 Homolog A (UNC93A) Antibody

Catalogue No.: abx029830

Unc93a, a human homolog of the *C. elegans* Unc93 gene, was initially identified by the sequencing of chromosome 6q27 at D6S193 as loss at this region correlated with sporadic ovarian cancer. Further analysis however, showed no tumor suppressor role for Unc93a and its function is unknown. It is expressed in testis, small intestine, spleen, prostate and ovary. Two isoforms of Unc93a are known to exist.
