

Ubiquitously Expressed Transcript Protein (UXT) Antibody

Catalogue No.: abx003121

Western blot analysis of extracts of various cell lines using UXT Antibody (1/1000 dilution).

UXT Antibody is a Rabbit Polyclonal antibody against UXT. The protein encoded by this gene functions as a cofactor that modulates androgen receptor-dependent transcription, and also plays a critical role in tumor necrosis factor-induced apoptosis. Expression of this gene may play a role in tumorigenesis. Alternatively spliced transcript variants encoding multiple isoforms have been observed for this gene.
