

26S Proteasome Non-ATPase Regulatory Subunit 14 (PSMD14) Antibody

Catalogue No.: abx213193

PSMD14 Antibody is a Rabbit Polyclonal against PSMD14. This gene encodes a component of the 26S proteasome. The 26S proteasome is a large multiprotein complex that catalyzes the degradation of ubiquitinated intracellular proteins. The encoded protein is a component of the 19S regulatory cap complex of the 26S proteasome and mediates substrate deubiquitination. A pseudogene of this gene is also located on the long arm of chromosome 2.
