

Alpha Adducin (ADD1) Antibody

Catalogue No.: abx326704

Alpha Adducin (ADD1) Antibody is a Rabbit Polyclonal against Alpha Adducin (ADD1). Adducins are a family of cytoskeletal proteins encoded by three genes (alpha, beta, and gamma). Adducin acts as a heterodimer of the related alpha, beta, or gamma subunits. The protein encoded by this gene represents the alpha subunit. Alpha- and beta-adducin include a protease-resistant N-terminal region and a protease-sensitive, hydrophilic C-terminal region. Adducin binds with high affinity to Ca(2+)/calmodulin and is a substrate for protein kinases A and C.
