

Human Allograft Inflammatory Factor 1 (AIF1) Protein

Catalogue No.: abx065221

SDS-PAGE analysis of Human AIF1 Protein.

Recombinant Allograft Inflammatory Factor 1 (AIF1) is a recombinant Human protein produced in a Prokaryotic expression system (E. coli).

Target: Allograft Inflammatory Factor 1 (AIF1)

Origin: Human

Expression: Recombinant

Tested Applications: WB, SDS-PAGE

Host: E. coli

Conjugation: Unconjugated

Form: Lyophilized

Purity: > 95%

Reconstitution: To keep the original salt concentration, we recommend reconstituting to the original concentration prior to lyophilization (see Concentration) in ddH₂O. If a lower concentration is required, dilute in 20 mM Tris, 150 mM NaCl, pH 8.0. If a higher concentration is required, the product can be reconstituted directly in 20 mM Tris, 150 mM NaCl, pH 8.0, though please note that this will change the overall salt concentration. The stock concentration should be between 0.1-1.0 mg/ml. Do not vortex.

Storage: Store at 2-8 °C for up to one month. Store at -80 °C for up to one year. Avoid repeated freeze/thaw cycles.
