

Protein Wnt-7a (WNT7A) Antibody

Catalogue No.: abx004155

Western blot analysis of extracts of various cell lines using WNT7A Antibody (1/1000 dilution).

WNT7A Antibody is a Rabbit Polyclonal antibody against WNT7A. This gene is a member of the WNT gene family, which consists of structurally related genes that encode secreted signaling proteins. These proteins have been implicated in oncogenesis and in several developmental processes, including regulation of cell fate and patterning during embryogenesis. This gene is involved in the development of the anterior-posterior axis in the female reproductive tract, and also plays a critical role in uterine smooth muscle patterning and maintenance of adult uterine function. Mutations in this gene are associated with Fuhrmann and Al-Awadi/Raas-Rothschild/Schinzel phocomelia syndromes.
