

Dengue Virus Type 2 NS1 Antigen

Catalogue No.: abx670273

Dengue Virus Type 2 NS1 Antigen is a Recombinant protein expressed in HEK293 cells. Strain: Thailand/16681/84.

This protein is presented in its native folded state complete with post-translational modifications, for optimal antigenicity. It is suitable for use in vaccine research and serology-based assays.

| | |
|-------------------------------|--|
| Target: | Dengue Virus Type 2 NS1 Antigen |
| Origin: | Virus |
| Tested Applications: | ELISA |
| Host: | HEK293 cells |
| Recommended dilutions: | Optimal dilutions/concentrations should be determined by the end user. |
| Conjugation: | Unconjugated |
| Form: | Liquid |
| Purity: | > 95% (SDS-PAGE) |
| Storage: | Store at -70°C. Avoid repeated freeze/thaw cycles. |
| Tag: | C-terminal 6 His tag |
| Buffer: | Dulbecco's phosphate buffered saline. Does not contain preservatives. |
| Concentration: | 2 mg/ml |
| Note: | <p>THIS PRODUCT IS FOR RESEARCH USE ONLY. NOT FOR USE IN DIAGNOSTIC, THERAPEUTIC OR COSMETIC PROCEDURES. NOT FOR HUMAN OR ANIMAL CONSUMPTION.</p> <p>This product is shipped with dry ice.</p> |
