

SARS-CoV-2 S1 Protein

Catalogue No.: abx160074

Severe Acute Respiratory Syndrome Coronavirus 2 (SARS-CoV-2/COVID-19) Spike S1 Protein is a recombinant protein expressed in Insect cells.

The SARS-CoV-2 Spike Protein (S protein) is a viral protein that allows the entry of SARS-CoV-2 into human cells. The protein forms trimers on the viral capsid and binds to human Angiotensin Converting Enzyme 2 (ACE2) located on the cell surface. The protein has a cleavage site between the S1 and S2 subunits that is targeted by the human enzyme Furin, and it may also cause the development of a syncytium (cell fusion). Antibodies to S protein can prevent viral entry as well as target the virus for further immune action.

Target:	Severe Acute Respiratory Syndrome Coronavirus 2 (SARS-CoV-2) S1 Protein
Origin:	Virus
Expression:	Recombinant
Tested Applications:	ELISA, WB
Host:	Insect
Recommended dilutions:	Optimal dilutions/concentrations should be determined by the end user.
Conjugation:	Unconjugated
Form:	Liquid
Purity:	≥ 85% (SDS-PAGE)
Purification:	Purified by affinity chromatography.
Storage:	Aliquot and store at -20 °C. Avoid repeated freeze/thaw cycles.
Molecular Weight:	Calculated MW: 76 kDa Observed MW (12% reducing SDS-PAGE): 85 kDa. Difference is due to glycosylation.
Sequence:	The amino acid sequence is proprietary.
Tag:	His tag
Buffer:	PBS, pH 7.4. Does not contain preservatives.

Datasheet

Version: 5.0.0

Revision date: 19 May 2025

Note: THIS PRODUCT IS FOR RESEARCH USE ONLY. NOT FOR USE IN DIAGNOSTIC, THERAPEUTIC OR COSMETIC PROCEDURES. NOT FOR HUMAN OR ANIMAL CONSUMPTION.

This product is shipped with dry ice.

Directions for use: Centrifuge before opening to ensure complete recovery of vial contents.

For Reference Only
