

Mouse Transthyretin (TTR) Protein

Catalogue No.: abx069455

SDS-PAGE analysis of recombinant Mouse Transthyretin Protein.

Recombinant Transthyretin (TTR) is a recombinant Mouse protein produced in a Prokaryotic expression system (E. coli).

Target: Transthyretin (TTR)

Origin: Mouse

Expression: Recombinant

Tested Applications: WB, SDS-PAGE

Host: E. coli

Conjugation: Unconjugated

Form: Lyophilized

Purity: > 97%

Reconstitution: To keep the original salt concentration, we recommend reconstituting to the original concentration prior to lyophilization (see Concentration) in ddH₂O. If a lower concentration is required, dilute in PBS, pH 7.4. If a higher concentration is required, the product can be reconstituted directly in PBS, pH 7.4, though please note that this will change the overall salt concentration. The stock concentration should be between 0.1-1.0 mg/ml. Do not vortex.

Storage: Store at 2-8 °C for up to one month. Store at -80 °C for up to one year. Avoid repeated freeze/thaw cycles.
