

Mouse Vascular Endothelial Growth Factor A (VEGFA) Protein

Catalogue No.: abx069632

Recombinant Vascular Endothelial Growth Factor A (VEGFA) is a recombinant Mouse protein produced in a Prokaryotic expression system (E. coli).

Target: Vascular Endothelial Growth Factor A (VEGFA)

Origin: Mouse

Tested Applications: WB, SDS-PAGE

Host: E. coli

Conjugation: Unconjugated

Form: Lyophilized

Purity: > 97%

Reconstitution: To keep the original salt concentration, we recommend reconstituting to the original concentration prior to lyophilization (see Concentration) in ddH₂O. If a lower concentration is required, dilute in PBS, pH 7.4. If a higher concentration is required, the product can be reconstituted directly in PBS, pH 7.4, though please note that this will change the overall salt concentration. The stock concentration should be between 0.1-1.0 mg/ml. Do not vortex.

Storage: Store at 2-8 °C for up to one month. Store at -80 °C for up to one year. Avoid repeated freeze/thaw cycles.

UniProt Primary AC: Q00731 ([UniProt](#), [ExPASy](#))

Molecular Weight: Calculated MW: 17.8 kDa
Observed MW (SDS-PAGE): 18 kDa

Sequence Fragment: Ala27-Arg146

Tag: N-terminal His tag

Buffer: Prior to lyophilization: PBS, pH 7.4, containing 0.01% Sarcosyl, 1 mM DTT, 5% Trehalose and Proclin-300.

Activity: Not tested

Concentration: Prior to lyophilization: 200 µg/ml

Datasheet

Version: 2.0.0

Revision date: 02 Jun 2025
