

Plant RNA Kit

Catalogue No.: abx098091

Plant RNA Kit provides a fast and easy column-based method to isolate total RNA from plant tissues. Samples are lysed with detergent to inactivate RNase. DNA is digested with DNase I. RNA is bound to silica membrane. After washing, high-quality RNA is eluted from the column. Isolated RNA is free of DNA and protein contamination, and is suitable for RT-PCR, qRT-PCR, Microarray analysis and Northern blot.

Target: Plant RNA Kit

Storage: Store at -20°C. Stable for 12 months from date of receipt.

Note: This product is for research use only. This product is shipped with dry ice.
