

Tripartite Motif Containing 13 (TRIM13) Antibody

Catalogue No.: abx004755

TRIM13 Antibody is a Rabbit Polyclonal antibody against TRIM13. This gene encodes a member of the tripartite motif (TRIM) family. The TRIM motif includes three zinc-binding domains, a RING, a B-box type 1 and a B-box type 2, and a coiled-coil region. This gene is located on chromosome 13 within the minimal deletion region for B-cell chronic lymphocytic leukemia. Multiple alternatively spliced transcript variants have been found for this gene.
