BNIP3L Antibody is a Rabbit Polyclonal antibody against BNIP3L. This gene is a member of the BCL2/adenovirus E1B 19 kDa-interacting protein (BNIP) family. It interacts with the E1B 19 kDa protein, which protects cells from virally-induced cell death. The encoded protein also interacts with E1B 19 kDa-like sequences of BCL2, another apoptotic protector. This protein counteracts the apoptotic inducer BNIP3 and may play a role in tumor suppression.
