

Tachykinin-3 (TAC3) Antibody

Catalogue No.: abx004825

Immunofluorescence analysis of HeLa cells using TAC3 Antibody

TAC3 Antibody is a Rabbit Polyclonal antibody against TAC3. This gene encodes a member of the tachykinin family of secreted neuropeptides. The encoded protein is primarily expressed in the central and peripheral nervous system and functions as a neurotransmitter. This protein is the ligand for the neurokinin-3 receptor. This protein is also expressed in the outer syncytiotrophoblast of the placenta and may be associated with pregnancy-induced hypertension and pre-eclampsia. Mutations in this gene are associated with normosmic hypogonadotropic hypogonadism. Alternate splicing results in multiple transcript variants.
