

## Tripartite Motif-Containing Protein 2 (TRIM2) Peptide

Catalogue No.: abx616562

Tripartite Motif-Containing Protein 2 (TRIM2) Peptide is a synthetic peptide. This peptide is used in the production of [abx432221](#).

|                               |                                                                                                                                            |
|-------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Target:</b>                | Tripartite Motif-Containing Protein 2 (TRIM2)                                                                                              |
| <b>Tested Applications:</b>   | P-ELISA                                                                                                                                    |
| <b>Host:</b>                  | Synthetic                                                                                                                                  |
| <b>Recommended dilutions:</b> | BL (predicted): 0.5 mg/ml. Optimal dilutions/concentrations should be determined by the end user.                                          |
| <b>Conjugation:</b>           | Unconjugated                                                                                                                               |
| <b>Form:</b>                  | Lyophilized                                                                                                                                |
| <b>Activity:</b>              | Not tested.                                                                                                                                |
| <b>Reconstitution:</b>        | Reconstitute in deionized water.                                                                                                           |
| <b>Storage:</b>               | Aliquot and store at -20°C. Avoid repeated freeze/thaw cycles.                                                                             |
| <b>Gene Symbol:</b>           | TRIM2                                                                                                                                      |
| <b>GeneID:</b>                | <a href="#">23321</a> <a href="#">80890</a> <a href="#">361970</a>                                                                         |
| <b>NCBI Accession:</b>        | NP_056086.2, NP_001123539.1                                                                                                                |
| <b>Sequence Fragment:</b>     | Internal region, 233-247 AA: C-STFDELQKTLNVRKS                                                                                             |
| <b>Buffer:</b>                | Prior to lyophilization: Deionized water.                                                                                                  |
