

Exosome Isolation Kit

Catalogue No.: abx705215

Exosome Isolation Kit is used for the selective capture of exosomes in urine, cell culture supernatant and other biological fluids. This kit uses size exclusion chromatography to separate exosomes based on molecular weight. Exosomes are used for a wide range of applications, including western blot, nanoparticle tracking analysis (NTA), nanoparticle flow cytometry for particle size characterization, electron microscopy, omics profiling, and functional studies in cellular and animal models.

Kit components: 10 ml Exosome Purification Column reagent and 10 ml Column Adaptor reagent.

Storage: Store at 2-8 °C for up to 18 months. Avoid exposure to light.

Buffer: Not applicable.

Sample Type: Urine, cell culture supernatant and other biological fluids.

Note: THIS PRODUCT IS FOR RESEARCH USE ONLY. NOT FOR USE IN DIAGNOSTIC, THERAPEUTIC OR COSMETIC PROCEDURES. NOT FOR HUMAN OR ANIMAL CONSUMPTION.

For Reference Only
