Human Glial Fibrillary Acidic Protein (GFAP) Protein

Catalogue No.:abx657663

Human Glial Fibrillary Acidic Protein (GFAP) is a Recombinant Human protein expressed in E.coli.

Target: Glial Fibrillary Acidic Protein (GFAP)

Research Area: Infection Immunity, Neuroscience

Origin: Human

Expression: Recombinant

Tested Applications: WB, SDS-PAGE

Host: E. coli

Conjugation: Unconjugated

Form: Lyophilized

Activity: Not tested

Purity: > 90%

Reconstitution: To keep the original salt concentration, we recommend reconstituting to the original concentration prior

to lyophilization (see Concentration) in ddH₂O. If a lower concentration is required, dilute in PBS, pH 7.4. If a higher concentration is required, the product can be reconstituted directly in PBS, pH 7.4, though please note that this will change the overall salt concentration. The stock concentration should

be between 0.1-1.0 mg/ml. Do not vortex.

Storage: Store at 2-8°C for up to one month. For long-term storage, store at -80°C. Avoid repeated freeze/thaw

cycles.
