

Peptidylprolyl Isomerase G / CYPG (PPIG) Antibody

Catalogue No.: abx000715

Western blot analysis of extracts of various cell lines using PPIG Antibody (1/1000 dilution).

PPIG Antibody is a Rabbit Polyclonal antibody against PPIG. PPIG (peptidylprolyl isomerase G (cyclophilin G)) is a protein-coding gene. Diseases associated with PPIG include myocardial infarction, and venous insufficiency. GO annotations related to this gene include peptidyl-prolyl cis-trans isomerase activity and cyclosporin A binding. An important paralog of this gene is NKTR.
