

ETS Translocation Variant 5 (ETV5) Antibody

Catalogue No.: abx010753

Western blot analysis using ETV5 antibody against Jurkat (1), NIH/3T3 (2) and MCF-7 (3) cell lysate.

ETS variant 5, transcription factor of the ETS family, divergent member of the winged helix-turn-helix superfamily, expressed in brain, placenta and other tissues involved in development. Tissue specificity: Ubiquitous. ERM is expressed in Sertoli cells and spermatogonial stem cells (SSCs). Studies on knockout mice have shown that it is required for SSC self-renewal but not differentiation, thus affected mice exhibit progressive germ cell depletion.
