

## Human AMT siRNA

Catalogue No.:abx907417

siRNA to inhibit AMT expression using RNA interference.

This product is provided as three 5 nmol vials (15 nmol) or 2x three 5 nmol vials (30 nmol) of lyophilized siRNA oligo duplexes. Each vial contains slightly different sequences to ensure full knockout of the gene. The duplexes can be transfected individually or pooled together to achieve knockdown of the target gene, which is most commonly assessed by qPCR or western blot.

Target:	AMT				
Reactivity:	Human				
Tested Applications:	RNAi				
Host:	Synthetic		C	6	
Recommended	Optimal dilutions/concentrations should be determined by the end user.				
	-			-	
dilutions:	Plate	Final Medium	Final siRNA	20 µM siRNA	Lipofectamine 2000

			10	1	5
Form:	Lyophilized	b			
Purity:	> 97%				
Quality Control:	Oligonucle	otide synthesis is	monitored base by base t	through trityl analysis	to ensure appropriate
	coupling efficiency. The oligo is subsequently purified by affinity-solid phase extraction. The				
	annealed RNA duplex is further analyzed by mass spectrometry to verify the exact composition of				
	the duplex	. Each lot is comp	ared to the previous lot by	y mass spectrometry	to ensure maximum lot-
	to-lot cons	istency.			
Storage:	Shipped at 4 °C. Store at -20 °C for up to one year.				
UniProt Primary AC:	P48728 ( <u>UniProt</u> , <u>ExPASy</u> )				
Gene Symbol:	AMT				

## Datasheet

Revision date: 03 Jun 2024

GenelD:	275
NCBI Accession:	NM_000481.3
KEGG:	hsa:275
Specificity:	AMT siRNA (Human) is a target-specific 19-23 nt siRNA oligo duplexes designed to knock down gene expression.
Note:	This product is for research use only.
Directions for use:	<ul> <li>1. Before resuspending, briefly centrifuge the tube to ensure the lyophilized siRNA is at the bottom of the tube.</li> <li>2. Resuspend the siRNA oligos to an appropriate concentration with DEPC water (e.g. resuspend one vial of 5 nmol siRNA oligo in 250 µl of DEPC water for a final concentration of 20 µM).</li> <li>3. Transfect with 10 nM - 100 nM siRNA 48 to 72 hours prior to cell lysis.</li> </ul>
